

Application for Rooftop Solar Installation

Reference No : 31312082601694

Date: 12-08-2026

I / we herewith apply for a solar energy net-metering/ bi-directional metering connection at the service connection for the Solar PV Project of which details are given below:

Consumer ID : 324333013087	Consumer Name: MAMATA BEHERA
Division : CED BALASORE	Sub-Division : SDO NILGIRI
Section : ESO MITRAPUR	Residential Address : BALIPAL AJODHYA
Mobile No. : 7873287528	e-Mail ID : gobindabehera787@gmail.com
Contract Demand : 1.00	Category : DOM
Solar Capacity applied for : 3	Sub Category : Residential
Supply Voltage : null	Selected Scheme : Solar Installation - Subsidized
DT Capacity : 0	

Declaration :

I do hereby declare that the information furnished above is true to my knowledge and belief.

Terms & Conditions of Connection & Operation :

1. Eligibility & Compliance

- The consumer shall comply with OERC Net Metering / Bi-directional Metering Orders, OERC Distribution (Conditions of Supply) Code, 2004, and relevant amendments.
- The system shall conform to CEA (Technical Standards for Connectivity of Distributed Generating Resources) Regulations, 2013, CEA (Installation and Operation of Meters) Regulations, 2006, and CEA (Safety and Electricity Supply) Regulations, 2010.

2. Technical & Interconnection Conditions

- The system shall include both automatic isolation (inverter-based) and manual disconnection devices accessible to the Distribution Licensee.
- The PV system shall cease to energize the grid during outages or islanding conditions.
- All equipment shall be BIS / IEC / IEEE compliant.
- The Licensee shall determine the interface and metering point.
- If the PV system causes disturbance or damages, the consumer shall disconnect and rectify the system at their own cost before reconnection.

3. Access, Safety & Clearances

- The Licensee shall have access to metering and disconnection points at all times for inspection, maintenance, or safety purposes.
- The consumer shall comply with the Central Electricity Authority (Measures Relating to Safety and Electricity Supply) Regulations, 2010.
- All equipment connected to the Licensee's Distribution System shall conform to relevant IEEE / IEC / BIS standards and comply with CEA safety and electricity supply regulations.
- If the system is found to cause or likely to cause damage or disturbance, the consumer shall disconnect and rectify it at their own cost upon the Licensee's direction.
- The Licensee shall not be liable for any injury or damage arising from back-feeding when grid supply is off and may disconnect the system in such exigencies to prevent accidents.

4. Commercial Settlement

- Energy accounting and billing shall follow the prevailing OERC Net Metering Order and subsequent amendments.
- The consumer shall bear all costs for PV system setup, interconnection, and metering.
- The Licensee is not responsible for fiscal or policy incentives beyond those specified by the Commission.

5. Liabilities

- Each party indemnifies the other against damages arising from negligence or intentional misconduct.
- Neither party is liable for loss of profits, goodwill, or indirect damages.
